Subject: RE: 2011 Data Request for Washington State

Hello Sarah-

Attached please find Amtrak's 2011 information in Excel format. The "Summary" tab has the total fuel consumption by county including yard switchers. Upon reviewing our previously submitted data, Jeff noticed some mistakes in the list of counties and track mileages assigned to our Washington routes. We have fixed the issues in this new spreadsheet; however, this means our 2008 submission has some errors. We just wanted to let you know and apologize for any inconvenience.

Please let us know if you have any questions.

Thanks,
Celia

Subject: 2011 Data Request for Washington State

Dear Ms. Pfleckl,

As you may already know, states are in the process of preparing 2011 air emissions inventories for federal reporting. The federal rule requires we report air emissions estimates by county and source. We also use the information for air quality modeling in the Pacific Northwest - most notably to make daily air quality forecasts. For this, we allocate total county rail emissions (UP+BNSF+Amtrak) evenly to the county railroad network (network from GIS dataset).

The data below is needed for the year 2011, for Washington State:

County
Track Segment Description
Annual Average GT
Miles of Track
Annual GTM
Fuel Use (gal) - Road (line haul)
of Switch Locomotives
Fuel use (gal) - Switch

If possible, I would like to get the information by July 1, 2012. If you could provide the data in Excel format, it would be nice. If not, pdf or Word document is OK. Our deadline for reporting is December 31, 2012. Thank you for your help.

Sincerely,

Sarah Clouse
